

CHANDAN KUMAR

Software Engineer • Backend Development • Distributed & Real-Time Systems

Ranchi, Jharkhand, India | +91 9631327565 | chandankumar38661@gmail.com | [LinkedIn](#) | [GitHub](#) | [Demo Video](#)

SUMMARY

Information Technology undergraduate with experience in backend development using Node.js, Express.js, MongoDB, and REST APIs. Strong foundation in DSA, DBMS, and operating systems with interest in scalable backend and real-time systems.

EDUCATION

Birsa Institute of Technology (BIT), Sindri

2024 — 2028

Bachelor of Technology in Information Technology

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, System Design

CGPA: 8.88

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, Java, C, SQL

Backend & APIs: Node.js, Express.js, REST APIs, Socket.io, JWT Authentication, Middleware Design, CRUD Operations

Databases: MongoDB, MySQL, Mongoose, Schema Design

AI / Machine Learning: OpenCV, YOLO, Model Fine-Tuning, ONNX, RKNN(basics)

Tools & DevOps: Git, GitHub, Postman, Linux/Ubuntu, SSH/SCP, VS Code

CS Fundamentals: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Real-Time Systems

EXPERIENCE

Backend Developer Intern — CodZenith

2025

SaaS Platform | Node.js, Express.js, MongoDB, REST APIs

Remote

- Developed and maintained REST APIs for an internship-management SaaS platform serving multiple cohorts of users.
- Implemented JWT-based authentication and role-based middleware to secure server-side endpoints and protect user data.
- Optimized request handling and database query patterns, reducing redundant calls and improving overall API responsiveness.
- Collaborated with senior engineers on feature development, code reviews, and debugging of production issues.

PROJECTS

B2B Commerce Platform — Full-Stack

2025

Node.js, Express.js, MongoDB, REST APIs

- Architected REST APIs and business workflows for a B2B order and supply-chain management platform.
- Implemented authentication, multi-role access control, and schema design for scalable multi-vendor support.
- Focused on clean code, modular routing, and reusable middleware to support iterative feature delivery.

Smart Civic Issue Reporting Platform

2025

Node.js, Express.js, MongoDB

- Built backend APIs and an escalation engine that auto-routes unresolved civic complaints to higher authorities after SLA breach.
- Designed transparent issue-tracking flows with role-based access for citizens, officials, and administrators.

ACHIEVEMENTS & INTERESTS

- Regularly practice Data Structures & Algorithms; Solved 300+ DSA problems across LeetCode, gfg and hackerRank..
- Strong interest in distributed systems, backend engineering, and real-time intelligent systems. Languages: English, Hindi.
- Participated in **Smart India Hackathon (SIH) 2025** as part of a team developing a software-based solution.
